  Lampa d'Art

Brand Specification

Lampad'art is a company founded by Joanne Yammine, an architect and a lighting designer.

It designs and produces handmade lighting fixtures and other domestic accessories all while maintaining the highest manufacturing standards.

Founder's Profile

Joanne yammine, an architect who specializes in lighting design and has graduated from the prestigious politecnico di Milano in Italy.

As a lighting designer she was always inspired by the retro and postmodern derivatives of design. This inspired her to fashion her first collection of light fixtures which are solely made of metallic pipe; the same kind of pipes she grew up around in her father's hardware shop.

Product Description

All of our items were completely handmade. It took multiple hours of hard work and dedication to design, assemble, paint, and complete each piece.

We used the finest quality of pipes, paint, electric wires and rest of materials to deliver to you a unique and durable product that can hopefully add some joy and light to your homes and businesses. We are proud of each piece in our collection and we hope that you enjoy them as much as we enjoyed making them.
